### Summary of reasons for decision:

The computer moving image file explicitly depicts sexual activity between a young man and woman. The Classification Office has considered whether it promotes or supports, or tends to promote or support, the exploitation of young persons for sexual purposes, and concluded that it does not. The participants both appear to be adults rather than young persons. The moving image file is classified R18 because children and teenagers lack the required maturity, life experience and understanding to view explicit depictions of sexual activity without it harming the forming of their sexual development

and attitudes towards sexual activity. This classification interferes with the freedom of expression affirmed by the New Zealand Bill of Rights Act 1990 but is a reasonable and demonstrably justifiable restriction in order to prevent likely injury to the public good.
